SUMMARY

To obtain a challenging position as a Cloud/DevOps Engineer where I can leverage my expertise in AWS services (EC2, S3, IAM, VPC, RDS, EBS, AMI), Linux, Docker, Kubernetes, and Jenkins to build, automate, and manage scalable cloud infrastructure. Eager to apply my knowledge of networking, databases, and programming to enhance system reliability, optimize deployment processes, and contribute to organizational growth while continuously expanding my technical skills.

EDUCATION

Bachelor of Computer Application (BCA)

KLS Gogte College of Commerce, Belgaum, Karnataka | Sep 2022 – May 2025 CGPA: 9.32

Pre-University Education (PCM)

Jain PU College, Belgaum, Karnataka | Jul 2020 – Apr 2022 Percentage: 64%

Secondary Education

Gomatesh High School, Karnataka Secondary Education Examination Board | Jul 2019 – Jun 2020
Percentage: 75.68%

TECHNICAL SKILLS

- **Cloud Technologies:** AWS, EC2, S3, VPC, IAM, RDS, EBS, AMI, CloudWatch, Load Balancers, Auto Scaling, NAT Gateway, IGW
- **Operating Systems:** Amazon Linux, Ubuntu, Windows
- **Programming:** Python, HTML, CSS
- **Networking:** Subnets, Route Tables, NACLs, Security Groups, TCP/UDP, DNS
- **DevOps Tools:** Git, GitHub, AWS CLI, Linux Shell Scripting, Jenkins, Docker, Kubernetes

PROJECTS

1. AWS VPC Multi-Tier Architecture

- Designed and deployed a VPC with public and private subnets across two Availability Zones.
- Launched EC2 instances and configured SSH, HTTP rules, and IAM roles.
- Implemented NAT Gateway, Internet Gateway, Route Tables, and NACLs to enable secure traffic flow.
- Configured CloudWatch logs and metrics for performance monitoring and alerting.

2. Static Website Hosting on AWS

- Hosted a static website on an EC2 instance using Amazon Linux and Apache.
- Configured Security Groups to allow secure HTTP/HTTPS and SSH access.
- Deployed a Bootstrap-based website and improved hosting reliability using AWS best practice

3. Nodejs App CI/CD Pipeline using Jenkins | Mar-2026

- Designed and implemented CI/CD pipeline for Node.js application using Jenkins
- Automated build, testing, and deployment processes
- Integrated Git for version control and automated build triggers
- Containerized application using Docker for consistent deployments
- Reduced manual intervention and improved release reliability

4. Online Book Recommendation System

- Developed full-stack e-commerce web application for online book purchases.
- Implemented Collaborative Filtering (Matrix Factorization) for personalized book recommendations.
- Integrated book catalog, category-based search, shopping cart, and secure user authentication.
- Managed backend database using MySQL for user data and orders.

CERTIFICATIONS

- Master in Cloud Architecture — Fortune Cloud Technologies (*Ongoing*)
- Front-End Development Certificate
- Hashgraph Developer Course
