PROJECTS

Online Book Recommendation System Using Collaborative Filtering | *Python* Jan. 2025 - Apr. 2025

- Developed a full-stack e-commerce web application for online book purchasing using Python, Django, HTML, CSS, Bootstrap, and JavaScript.
- Implemented a Recommendation System using Collaborative Filtering (Matrix Factorization) to suggest personalized book recommendations based on user ratings.
- Integrated key e-commerce features including a book catalog, category-based search, shopping cart, and secure user authentication (signup, login, profile management).
- Utilized MySQL for backend database management, handling user data, orders, and dynamic content efficiently.

Amazon Website Clone | *HTML, CSS, JS* Aug. 2024 – Sep. 2024

- Developed a responsive clone of Amazon's homepage and product listing pages using HTML5, CSS3, and JavaScript to replicate real-world e-commerce UI/UX.
- Implemented dynamic features like product sliders, category navigation, and interactive buttons (e.g., "Add to Cart") using vanilla JavaScript.
- Designed mobile-first responsive layouts with Flexbox and Grid, ensuring cross-device compatibility and seamless user experience.

CERTIFICATIONS

- Completed **Front-end development**
- Completed **Hashgraph Developer Course**
- Completed **Digital skills and user experience**
